EDUCATION

California State Polytechnic University, Pomona

Graduated December 2024

Bachelor of Science, Computer Science

- Minor: Data Science
- Graduated with Honors, 3.8 GPA

EXPERIENCE AND PROJECTS

Data Analyst

October 2025–February 2026

Primary Freight Services

- Served as sole Data Analyst, consolidating **7,000+ shipment records** from CargoWise and Tai TMS into centralized reporting models, eliminating fragmented Excel-based reporting across departments.
- Designed star-schema relational data models and built ETL pipelines in **Python** and **Power Query** to clean, normalize, and standardize revenue and cost data.
- Led transition from manual reporting to **automated Power BI dashboards** tracking shipment volume, gross margin, and service KPIs.
- Presented executive-level slide deck and financial analysis to inform management on operational and pricing decisions.
- Developed roadmap for migration to **Azure SQL**-based analytics infrastructure to support scalable reporting and automation.

Data Analyst - Medical Clinic Appointment No-show Analysis

June 2025

Independent Project

- Analyzed **71,000+ real-world appointments** across **14 features** (age, wait time, SMS reminders, etc.) using Excel and Power Query to identify primary drivers of patient no-shows.
- Performed segmentation and trend analysis to quantify operational impact of missed appointments.
- Built interactive **Excel dashboard** with KPI tracking and visualizations enabling leadership to target high-risk patient segments.
- Delivered implementation roadmap projected to **reduce no-shows by 15%**, representing **~\$157,000 in annual cost savings**.

Data Scientist - Remote Kinematic Analysis for Mobility Scooter Riders

February 2024–December 2024

Sponsored Research - National Science Foundation (NSF)

- Processed 388K+ video frames using **Python** to extract biomechanical features and generate quantitative safety metrics for clinician evaluation.
- Developed real-time data processing workflows using **OpenCV** and pose estimation techniques.
- Integrated **Firestore cloud** backend to manage structured data outputs from team-built Android application.

Photogrammetry Automation Researcher - STARS Research Internship

June 2023–August 2023

Undergraduate Research - California State Polytechnic University, Pomona

- Automated 3D modeling workflow by developing a Blender add-on in **Python** to optimize geometric plane application processes.
- Presented research findings at the Annual CPP Creative Activities & Research Symposium (CARS).

HONORS AND AWARDS

- University Honors - **Dean's List, President's List** 2020–2024
- Boy Scouts of America - **Eagle Scout** 2013–2020

TECHNICAL SKILLS

Languages & Analytics Tools: Python, SQL, Excel (Power Query), Power BI (DAX), Tableau

Data Skills: Data Cleaning & Transformation, ETL Development, Relational Modeling (Star Schema), Dashboard Development, KPI Design

Concepts: Statistical Analysis, Data Visualization, Machine Learning Fundamentals
